

THE LOT, INDEXED.

- already indexing: 150+ self-service yards nationwide · 28 makes scored
- every car · every row · every VIN · your photos · your price list, as-is
- re-indexed nightly – 2pm sets are live by morning
- prices cross-checked against ebay listings, refreshed nightly
- prices stamped with their index date. your counter price governs.
- set once, marketed nightly – every re-index puts the same car back in front of every buyer hunting its parts.

PUT IT TO WORK.

- 1 check your listing – your lot may already be indexed. scan the QR and see what pickers see.
- 2 keep your set list public – that's everything we need. no logins, no software, nothing to install.
- 3 give the counter card register space – a QR stand we supply, free, linking to your own lot's page.

yardbrain.online

who's behind it – christopher radtko. 34, swedish immigrant, father of one, builder of tools that turn efficiency into capital – saas platforms, custom shop software, now the math for the yard. henderson, nv.

yardbrain · your lot, indexed nightly

EVERY PART STILL BOLTED ON IS A SALE YOU DIDN'T RING.

yardbrain finds the buyer · costs your yard \$0

THE PHONE IS NOT AN INVENTORY SYSTEM.

- your set list is already online – a year, a make, a row. that’s all it says.
- so “got a ’03 accord, and is the alternator still on it?” still gets answered from memory, all day, by whoever grabbed the phone.
- the customer who can’t confirm the part doesn’t drive out. it stays bolted to the car.

EVERY CAR YOU SET, IN YOUR PICKERS’ POCKETS.

- we index your lot nightly: every car, its row, its VIN, your photos, your own price list.
- every VIN decoded; every pullable part matched against OEM catalogs and ebay listings, refreshed nightly.
- subscribers get profit scores, and alerts the night your sets match their wanted lists. they walk in with a list and a row number.
- browsers cost you nothing – they were never going to call. the part question gets answered before the phone rings.

\$142.12

his margin is the reason he keeps coming back. every dollar of it clears your register first.

who pays for the math? subscribers do:

master	\$99.99/mo
location	\$49.99/mo
manufacturer	\$24.99/mo

they pay for VIN decode, OE matching, ebay comps, scoring. your list is public either way – we show it free to everyone.

every car is on a crusher clock. the parts pickers can find come off before it runs out.

your yard: \$0. no contract. no software. nothing leaves your lot but parts.

no cut of your counter. your price, your receipt, your money – we never touch the register.
